## Troll Dolls Website

For my microsite, I'll be focusing on Troll Dolls. I'd like to separate my content into several pages, with a navigation bar near the top of the website. I'd like to start with an introductory home page and another page for the history and different iterations of the dolls and brand. I'd also like to include the toy's influences, cultural references, and information of Troll Doll collectors.

- **Home Page/Introduction** – Landing screen, idea of clicking onto a png of a troll doll to get to the introduction page?
